## Foreword

The *Statistical Abstract of Oklahoma* is a comprehensive single source reference for economic and demographic statistical data pertaining to the state. Data are compiled from in-house data bases and a variety of federal, state, local and private references. In addition to pertinent data for Oklahoma, the *Abstract* presents comparative data for other southwestern states and the United States in many of the sections.

This volume presents the most current data available on July 1, 1989. Since revising statistical data is a continuous process, the Center for Economic and Management Research can supply more recent and, in most cases, more extensive data coverage.

This edition of the *Statistical Abstract of Oklahoma* marks the 20th year of this publication. As a result of additional funding and assistance provided by the Research and Planning Division of the Oklahoma Department of Commerce, the *Abstract* is published each year. In addition, all of the information contained in this *Abstract* is available in the Oklahoma Resources Integrated General Information Network System (ORIGINS) which is a second project also sponsored by the Oklahoma Department of Commerce and maintained by the Office of Business and Economic Research at Oklahoma State University.

## Acknowledgments

In compiling this *Abstract*, the Center for Economic and Management Research acknowledges the cooperation and assistance of numerous persons in both public and private agencies who generously contributed time and effort to provide us with much of the data contained in this volume.

The following members of the Center contributed significantly to the preparation of the 1989 *Statistical Abstract of Oklahoma.* Data Compilation: Lisa Bradley, Marjorie Earley, Brian Hickey and Shellie O'Donnell; Production: Marilyn Cain, Daniel Chu, Susan Clancy, Warren Dickson, Julia Rojas, Alice Watkins and Pat Wickham.

# Preface

In March 1988, Oklahoma Futures, a public/private board that oversees economic development efforts in the state, approved a five-year economic plan for the State of Oklahoma. Strategy E of the plan states: "Provide information to assist business decisions and improve cooperative working relationships between Oklahomans." An important part of this strategy is the creation of ORIGINS. ORIGINS or Oklahoma Integrated General Information Network System is an economic development information system that enables economic development professionals and others to access the latest available information about Oklahoma using a personal computer and modem. Just as important, ORIGINS is a unique partnership between the Oklahoma Department of Commerce, the Center for Economic and Management Research at the University of Oklahoma and Office of Business and Economic Research at Oklahoma State University.

A considerable part of the ORIGINS project has been the expansion of the *Statistical Abstract of Oklahoma.* Last year, the expansion consisted of the addition of over sixty new tables and publishing the *Abstract* annually instead of bi-annually. In addition, tables from the *Abstract* were made available electronically on ORIGINS. This year, the *Abstract* has been reorganized and more tables added to further enhance the *Abstract*.

The *Abstract* has for a long time been an essential part of the informational scene in Oklahoma. By joining efforts with ORIGINS, the future of the *Abstract* is bright. Look for exciting enhancements in the *Abstract* in future years.

The Oklahoma Department of Commerce is pleased to be a part of this partnership with the Center for Economic and Management Research and looks to future endeavors. If you would like additional information concerning ORIGINS, please call the Oklahoma Department of Commerce (405) 843-9770.

Note: Minority group is the sum of Spanish American and all races except white. Some duplication is possible since Spanish American may include non-white races as well as white. Work force for some groups in a county too small to be meaningful.

### Oklahoma Tax System

The Oklahoma Revenue System consists of both state taxes and those levied by local units of government. The major local tax is that levied by individual counties on real estate and tangible personal property not taxed in lieu by the state.
The state levies a 4 percent tax on the gross receipts from selected sales and services and allows municipalities and counties to impose their own sales tax on the same items covered by the state levy.

The state has exclusive taxing rights on mineral, oil and gas production and on rural electric co-ops. Other state taxes in lieu of local taxation include license fees for motor vehicles, mobile homes, travel trailers, boats and boat motors.
And only the state levies taxes on incomes, corporate franchises, estates, insurance premiums, real estate and vehicle transactions, cigarettes, tobacco products and motor fuel.

Alcoholic beverages and 3.2 percent beer are taxed only by the state, but both state and local license fees are levied.

This section contains a capsule summary of the major tax laws administered or supervised by the Oklahoma Tax Commission.

This information is intended as a guide only and not as the whole story or last word on a given tax situation.

### Individual Income Tax Withholding

Withholding schedules provide graduated rates of tax to be withheld by employers each pay period, giving consideration to wage-earner's marital status and number of dependents claimed. These withholding rates are designed to approximately cover the tax that will be due for taxpayers with standard deductions.

### Declaration and Payment of Estimated Taxes

Individual taxpayers expecting to owe as much as $25 more than will be withheld must file a declaration of estimated taxes by the 15th day of the 4th month of the tax year. Payments of estimated taxes may be made quarterly, with the first payment due at the time of filing the estimate.

Corporations and Trusts expecting income tax liability in excess of $100 must file a declaration to file estimated tax and make the first quarterly payment by the 15th day of the 4th month of the tax year.

### Corporation Income Tax

Flat rate: 5 percent of Oklahoma taxable income.

Note: "Direct Distribution" involves only those state levied taxes dedicated by statute (earmarked) to schools, county governments and municipalities. Cities and towns receive funds from the state alcoholic beverage tax on the basis of total area and population, while population alone is used to determine shares of state tax revenues from gasoline and motor vehicle levies.

Note: See Note, TABLE 7.05, for definition of 'Direct Distribution.' School District funds from motor vehicle and gross production taxes are divided among county schools according to average daily attendance, with those funds from state gross production taxes being shared only in those counties with oil, gas and mineral production. Funds from the state rural electric co-op tax are divided among schools according to the number of miles of powerlines within the respective school district of each county as of January 1 of the tax year.

Note: Certain transactions relating to federal financial assistance may appear in the records of more than one state grantee agency. To avoid duplication and the overstatement of the aggregate level of federal financial assistance expended by the State of Oklahoma, when monies are received by one state grantee agency and redistributed (expended) to another state grantee agency (i.e., a pass-through of funds by the primary recipient state grantee agency to a subrecipient state grantee agency), the federal financial assistance will be listed first under the primary recipient followed by the subrecipient (S).

[a] Preliminary figures.

All income derived from farm operations and Government farm programs is included in the above table. The following description of terms may be helpful in interpreting the table.

Cash Receipts from Farm Marketings - Receipts from sales, loans made or guaranteed by CCC and purchases u price support programs.

Government Payments - Those payments made to farmers in connection with programs such as Agricultural Conservation, Feed Grain, Wheat and Cotton, Disaster Payments, etc.

Non-Money Income - Includes the value of farm products consumed directly in farm households and the rental v of housing provided by farm dwellings. Expenses are included in the production expense estimates, thus non-money imputations do not add on a dollar-for-dollar basis.

Realized Gross Farm Income - The sum of the above income sources.

Farm Production Expenses - Cost of current operations (excludes new capital equipment, taxes, and rents).

Realized Net Farm Income - Realized gross income minus production expenses.

Net Change in Farm Inventories - Value of change in quantities of crops and livestock products kept on farms fro one year to the next (may be a minus value).

Total Net Farm Income - Realized net income plus the net change in inventories.

NON-COMMERCIAL VEHICLES: Includes automobiles, travel trailers, motor homes, and motorcycles.

The method of calculation is as follows: $17.75 base fee + 1-1/4% of the Factory Delivered Price on new vehicles and reduced each year to 90% of the previous year's fee.

## 1987

---

AUTOMOBILE: Every passenger-carrying motor vehicle not used for hire. This includes all vehicles of the station wagon type by whatever name they are called.

TRAVEL TRAILER: Every non-motorized vehicle manufactured and used only as temporary dwelling or recreational purposes and being no longer than 40 feet nor wider than 8 feet.

MOTOR HOME (Recreational Vehicles): Every self-propelled vehicle permanently constructed and equipped as living quarters and capable of being operated on the highways. This category does not include so-called 'camper' type vehicles from which such living quarters are removable.

MOTORCYCLE: Motorcycles are those vehicles designed and constructed to travel on not more than three (3) wheels and having a saddle or a single seat for the use of the rider.

FARM TRUCK: Every truck used primarily for agricultural or forestry purposes. Farm truck license fees are $33 per year.

MANUFACTURED HOME: Every non-motorized vehicle manufactured and used primarily as a permanent dwelling. Annual license fee is in lieu of Ad Valorem tax and is based on the selling price with depreciation of not more than 65% of the resale price. After the first registration, manufactured homes are placed on the Ad Valorem tax rolls.

TAX EXEMPT: All motor vehicles owned by the State, municipalities and counties, including those operated by state-supported colleges and public school districts. Also tax exempt are church buses, manufactured homes and vehicles owned by certain non-profit organizations and institutions. Vehicles owned by disabled veterans, up to a maximum of two, are tax exempt. There is a base $1 charge for each tax exempt license plate.

COMMERCIAL VEHICLES: Includes commercial trucks, truck tractors, and all prorated vehicles.

COMMERCIAL TRUCK: Every truck not qualifying as a farm truck and used commercially. License fees are based on the combined weight of the truck and its cargo plus the laden weight of any trailer or trailers being towed. There is no reduction in fees for the first five years, but such vehicles with laden weight under 15,000 pounds are licensed at reduced rates in the sixth and seventh years but never below $10.

TRUCK-TRACTOR: Every motor vehicle designed to pull other vehicles on the highway but not capable of carrying a load of its own. Annual fees are based on the combined weight of the tractor and the loaded trailer or trailers being transported. There is no reduction in fee for the age of the vehicle.

PRORATED VEHICLES: Commercial Truck-Tractors and Commercial Trailers operating in interstate commerce by Oklahoma fees in proportion to their use of Oklahoma highways. Prorata licenses are issued only by the Oklahoma Tax Commission Motor Vehicle Division.

COMMERCIAL TRAILER: Every non-motorized conveyance designed to be drawn by a motor vehicle and used in commercial enterprise. Such trailers, semi-trailers and pole-trailers are licensed at an annual fee of $43 regardless of size, age, or carrying capacity. Beginning March 17, 1987, commercial trailers will be tagged with a non-expiring tag.

Note: A BTU is the quantity of heat required to raise the temperature of one pound of water 1 degree F at or near its point of maximum density. Part of the decline in Gas Utility Sales is due to the continued increase in activity in spot market sales and the resulting transportation of gas to end-users.

Source: Oklahoma 2000, Inc., State Policy and Economic Development in Oklahoma, 1989, p. 39. Compiled by Dr. Daniel D. Badger, Department of Agricultural Economics, OSU, from data provided by the Oklahoma Tourism and Recreation Department (Division of State Parks), National Park Service, the Forest Service, U.S. Fish and Wildlife Service, and the Tulsa District of the U.S. Army Corps of Engineers.

[a] State parks include parks, recreation areas, monuments, memorials, and museums.

[b] Attendance for other wildlife refuges not included.

[c] Originally Platt National Park and Arbuckle National Recreation Area.

[d] The recreation attendance figures for Lake Texoma have been adjusted to delete the visitation on the Texas side of the lake.

[e] Some duplication occurs in counting attendance at State Parks located at Corps of Engineers lakes; however, the trends over time are the key factor.

[f] The Tulsa District of The Corps of Engineers has changed its method of calculating recreation use to visitor hours, effective in 1987. Rather than use visitor hours, the number of vehicles was multiplied by 2.1 persons per vehicle to estimate visitor days for 1987.
